### About Me

Full Stack Web Developer with hands-on experience building real-world applications, including an Inventory Management System. Skilled in frontend and backend development using React, Node.js, and Express. Passionate about building scalable systems and solving real world problems.

### Education

Bachelor of Computer Applications (BCA)

Allahabad State University

{Currently Pursuing}

### Current Learning

- Backend development using Go (Golang) with Fiber
- Building scalable REST APIs
- PostgreSQL performance optimization
- Clean backend architecture and best practices

## Technical Skills

### Frontend

React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive UI Development

### Backend

Go (Golang), Fiber Framework, Node.js, Express.js, RESTful API, Development, Authentication & Authorization (JWT)

### Database

PostgreSQL, MongoDB, SQL Queries, Joins, Transactions, Database Design & Optimization

### Tools & Others

Git & GitHub, API Testing (Postman), Environment Configuration, MVC Architecture, Error Handling & Validation

## Projects

### Inventory Management System (Full Stack)

*Tech Stack : React, Node.js, PostgreSQL*

- Designed and developed a complete Inventory Management System with real world business logic.
- Implemented product, stock, and invoice management with full CRUD functionality.
- Built secure backend APIs with authentication, authorization, and proper error handling.
- Integrated GST calculations, totals, and invoice workflows.
- Used database transactions to ensure data consistency during stock updates.
- Created a responsive admin dashboard for efficient inventory tracking.

### MediScript AI – Medicine Info & Recommendation System

*Tech Stack : React, Vite, Tailwind CSS, AI API Integration*

- Developed an AI-powered web application to fetch and display medicine information based on user input.
- Implemented features to show medicine usage, symptoms, and suggested medications using AI-generated responses.
- Built a responsive React app with AI API integration, async handling, and reusable component based architecture.

### Additional Projects

- Full E-Commerce UI (Frontend)
- Typing Test Application
- Weather Forecast Application
- Natural Disaster Information System
- Admin Dashboard UI for Management Systems
- Authentication UI Flow (Login, Signup, Reset Password)
- Invoice & Billing System UI

## Soft Skills

- Problem-solving and analytical thinking
- Strong debugging and troubleshooting ability
- Clear communication of technical ideas
- Ability to learn new technologies quickly
- Time management and task prioritization
- Team collaboration and adaptability
- Attention to detail in UI and business logic
- Ownership mindset and responsibility for tasks
